

15336 REGOLITH BRECCIA (?), GLASS-COATED ST. 7 0.2 g

INTRODUCTION: 15336 is a light-colored breccia chip which is half-coated with a vesicular glass (Fig. 1). Possibly it is an agglutinate. It has never been subdivided or allocated. It was collected as part of the rake sample from the north-east rim of Spur Crater.

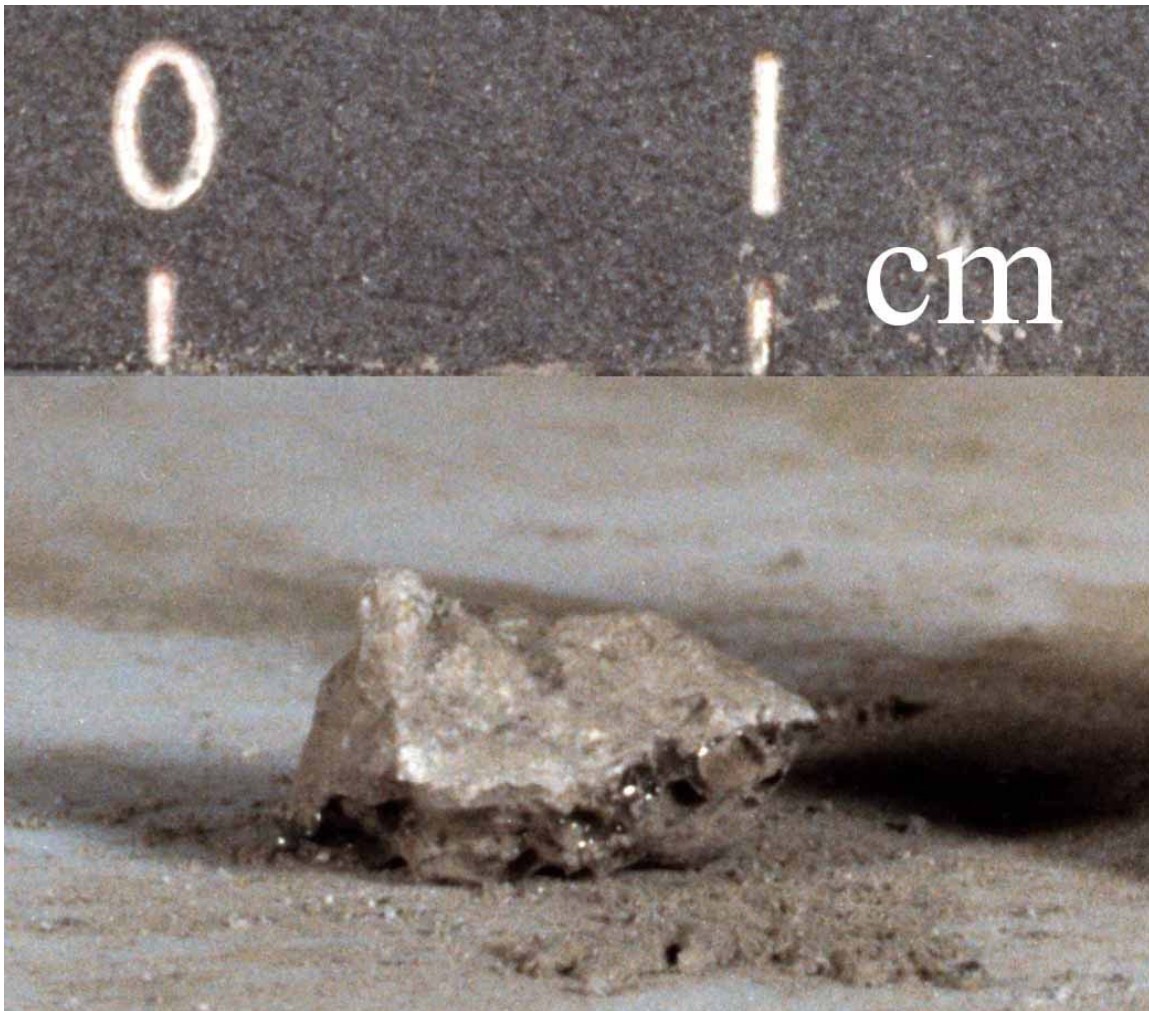

Figure 1. Sample 15336. The vesicular glass is on the bottom on this view. S-71-49633
