

79125

Microbreccia

1.91 g, 2 x 1.2 x 1 cm

INTRODUCTION

79125 was described as a very dark gray - brownish black, subangular microbreccia

containing a few non-penetrative fractures (Apollo 17 Lunar Sample Information Catalog, 1973). Zap pits are only present on one surface.

PROCESSING

As no work has been conducted on this sample, it is still intact.
