

76036

Impact Melt Breccia

3.95 g, 2.5 x 2 x 0.6cm

INTRODUCTION

Sample 76036 was collected from the soil about 20 meters downslope from the Boulder 6 area. It is a dark grey impact melt breccia.

PETROGRAPHY

Sample 76036 has not been studied, but it is apparently similar to and probably a piece of 76035. One side

has small impact craters; the other side has a few white inclusions (Fig. 1).

Figure 1: Dark grey impact melt breccia 76036. Cube is 1 cm. S73-17959.
